Yes	Because, from this subject, we meet new learning and knowledge every day. Since we have our own business, all these subjects are used in it.		Yes	Because, from this we can deal with business related things in daily life, and can give this information to others.		Because, this course is easy to learn, and the language in it is easy to understand and study.	Instead of emphasizing on how to finish the course quickly, students should focus on how each topic will be clear and how they can be given knowledge of those topics.	The course is quite good, only the course should be from the point of view that you can increase your knowledge through this study and you will get a lot of knowledge ghetta from it and the takers should not study with the thought that they will get a degree.	No

UmmeAyman Sameer Yerunkar	8446573549	ummeaymanyerunkar@gmail.com	F.Y.Bcom	Easy	Yes	Yes	Yes	If we going with this course ahead we'll definitely can grab what we have learnt in this course.		Yes	Yeah! Some main subs are applicable like acc's, banking and marketing.		No		Personality Development comes with learning skills and techniques not with subjects.	When we practically said to do certain activities because in real world the skills of person is important to do that particular job and when we do it actually we understand it theoretical just mugging up is no use.	When we're said to learn something and write it down because sometimes we don't learn we mugg up and we don't need these mugging we are need to know what are our skills. In reality skills are more important. An average students can earn lakhs of rupees but a brilliant student can't just because he/she just knows to learn and write there's no practical knowledge.	Make us do activities which's able to show up our skills. That can help.	No comments
