

# **M. Sc. Computer Science**

## **Syllabus**

**M.C.E. Society's  
ABEDA INAMDAR SENIOR COLLEGE OF ARTS,  
SCIENCE AND COMMERCE (AUTONOMOUS), PUNE**

**With effect from 2023-2024**

**M. C. E. Society's**

**Abeda Inamdar Senior College**

Of Arts, Science and Commerce, Camp, Pune-1 (Autonomous)

Affiliated to Savitribai Phule Pune University NAAC accredited 'A'

Grade

### **M.Sc.I 2023-24 (CBCS – Autonomy 21 Pattern)**

<b>Course/ Paper Title</b>	<b>Software Architecture and Design Patterns</b>
<b>Course Code</b>	23SMCS11MM
<b>Semester</b>	I
<b>No. of Credits</b>	4
<b>Course Type</b>	<b>Major (MJ)</b>

### **Aims & Objectives of the Course**

<b>Sr. No.</b>	<b>Objectives</b>
<b>1.</b>	To introduce students to the basic concepts and techniques of SADP.
<b>2.</b>	To write java programs using Design Pattern and Frameworks to create reusable and flexible software systems.
<b>3.</b>	To understand Use of patterns and architectures for solving practical problems.
<b>4.</b>	To understand about design pattern.
<b>5.</b>	To understand about the process of deploying web apps using specific Frameworks

### **Expected Course Specific Learning Outcome**

<b>Sr. No.</b>	<b>Learning Outcome</b>
<b>1.</b>	Students will recognize the characteristics of patterns that make it useful to solve real-world problems.
<b>2.</b>	Students will process available data using python libraries and predict outcomes using Machine Learning algorithms to solve given problem.
<b>3.</b>	Student will Able to use specific frameworks as per applications need.
<b>4</b>	Students can design java application using design pattern techniques.

## Syllabus

Unit No	Title with Contents	No. of Lectures
<b>Unit I</b>	<b>Introduction</b>	2
	1. UML The Notation	1
	2. Process Unified Process / Rational Unified Process inception,elaboration, construction, transition	1
	3. How various components fit in the life cycle	1
	4. The artifacts at end of each process / discipline	1
<b>Unit II</b>	<b>Software Architecture</b>	4
	1. What Software Architecture is and what it isn't.	1
	2. Why is architecture important?	1
	3. Architectural structures and views	2
<b>Unit III</b>	<b>Architectural Styles</b>	6
	1. Architectural Styles	1
	2. Pipes and Filters	1
	3. Data Abstraction and Object – Oriented Organization	1
	4. Event-Based, Implicit Invocation	1
	5. Layered Systems	1
	6. Repositories	1
	7. Interpreters	2
	8. Other familiar Architectures	2
	9. Heterogeneous Architectures.	2
<b>Unit IV</b>	<b>Introduction to Patterns</b>	4
	1. What is a Pattern & Design Pattern	1
	2. What makes a Pattern (GOF)	1
	3. Describing Design Patterns.	1
	4. Pattern Categories & Relationships between Patterns.	1
	4.5Organizing the Catalogue.	1
	5. Patterns and Software Architecture.	1
<b>Unit V</b>	<b>Study of Design Patterns</b>	12
	1. Creational Patterns-singleton, factory method, abstract factory	3
	2. Structural Patterns-adapter, decorator, facade	3
	3. Behavioural Patterns-	6
	i. Iterator	
	ii. Observer	
	iii. Strategy	
	iv. command and state (study of intent, applicability, participants, structure, collaboration , Java Example code,Implementation and consequences)	

<b>Unit VI</b>	<b>GRASP(General Responsibility Assignment Software Patterns)</b>	10
	1. Expert, Creator, High Cohesion, Low Coupling	4
	2. Controller, Polymorphism, Pure Fabrication, Indirection	4
	3. Don't Talk to Strangers	2
<b>Unit VII</b>	<b>Study of Frameworks</b>	12
	1. Frameworks as reusable chunks of architecture	1
	2. The framework lifecycle, development using frameworks	1
	3. Spring Core Framework	1
	4. Spring Boot Framework	1
	5. Microservices with Spring	1
	6. Web Architectures:	2
	i. Google Web Tool Kit	
	ii. Spring	
	iii. Hibernate etc.	2
	7. Selection of proper framework	1
	8. Comparing Frameworks	1
	9. Advantages of Spring	1
	10. Web based Case Study	1
<b>Unit VIII</b>	<b>Case Study (any one of the web Architecture)</b>	10
	1. Take a Framework and find Patterns in the Frame work.	4
	2. Benefits of Patterns in the chosen Framework	3
	3. How Pattern interact in the selected Framework	3

<b>Sr. No.</b>	<b>Objectives</b>
<b>1.</b>	To introduce students to the basic concepts and techniques of Machine Learning.
<b>2.</b>	To write python programs using machine learning algorithms for solving practical problems.
<b>3.</b>	To understand about Machine Learning Library and use cases.
<b>4.</b>	To understand about the process of deploying ML model.

### **Expected Course Specific Learning Outcome**

<b>Sr. No.</b>	<b>Learning Outcome</b>
<b>1.</b>	Students will able to recognize the characteristics of machine learning that make it useful to real-world problems.
<b>2.</b>	Students will process available data using python libraries and predict outcomes using Machine Learning algorithms to solve given problem.
<b>3.</b>	Students will able to estimate Machine Learning models efficiency using suitable metrics.
<b>4.</b>	Students will able to design application using machine learning techniques.

## Syllabus

Unit No	Title with Contents	No. of Lectures
<b>Unit I</b>	<b>Introduction to Machine Learning</b>	10
	1. Data Science, Artificial Intelligence and Machine Learning 2. Why Learn and What is Learning <ol style="list-style-type: none"> <li>What is Machine Learning</li> <li>Traditional Programming Vs. Machine Learning</li> <li>Machine Learning Process</li> <li>Types of Data</li> <li>Key Elements of Machine Learning (Representation, Evaluation and Optimization)</li> </ol>	1 3
	vi. Dimensionality Reduction (Feature Reduction) 3. Descriptive and Inferential Statistics: <ol style="list-style-type: none"> <li>Probability Distribution</li> <li>Distance Measures (Euclidean and Manhattan)</li> <li>Correlation and Regression</li> <li>Hypothesis Testing</li> <li>Creating our own dataset</li> <li>Importing the dataset, Handling</li> </ol> 4. Missing Data, Splitting the dataset into the Training set and Test set, Feature Scaling	3 3
<b>Unit II</b>	<b>Machine Learning Models</b>	8
	1. Type of Learning- <ol style="list-style-type: none"> <li>Supervised</li> <li>Unsupervised</li> <li>Semi Supervised Learning</li> </ol> 2. Components of Generalization Error (Bias, Variance, underfitting, overfitting) 3. A Learning System Cycle 4. Metrics for evaluation : <ol style="list-style-type: none"> <li>Accuracy</li> <li>Scalability</li> <li>squared error</li> <li>precision and recall</li> <li>likelihood</li> </ol> 5. Classification Accuracy and Performance	2 1 1 2 2
<b>Unit III</b>	<b>Regression Models</b>	12
	1. Linear Regression <ol style="list-style-type: none"> <li>Simple</li> <li>Multiple</li> <li>Polynomial</li> </ol> 2. Non-linear Regression <ol style="list-style-type: none"> <li>Decision Tree</li> <li>Support Vector</li> <li>Random Forest</li> </ol>	6 6

<b>Unit IV</b>	<b>Classification Models</b>	16
	1. K – Nearest Neighbors (KNN) 2. Logistic Regression 3. Naïve Bayes Theorem 4. Support Vector Machine 5. Decision Forest Classification 6. Random Tree Classification 7. Dimensionality Reduction Algorithms 8. Gradient Boosting algorithms <ul style="list-style-type: none"> <li>i. GBM</li> <li>ii. XGBoost</li> <li>iii. LightGBM</li> <li>iv. CatGBM</li> </ul>	2 1 2 1 1 2 2 5
<b>Unit V</b>	<b>Clustering Models</b>	8
	1. K-means 2. Hierarchical Clustering (Agglomerative, Divisive), Dendrogram 3. Selecting optimal number of clusters: Within Clusters Sum of Squares (WCSS) by Elbow Method	2 3 3
<b>Unit VI</b>	<b>Association Rules</b>	6
	1. Key Terms: Support, Confidence and Lift 2. Apriori Algorithm	3 3

### **Aims & Objectives of the Course**

<b>Sr. No.</b>	<b>Objective s</b>
<b>1.</b>	To introduce students to the basic concepts and techniques of Data Mining.
<b>2.</b>	To develop skills of using recent data mining software for solving practical problems.
<b>3.</b>	To extend to the knowledge about data mining
<b>4.</b>	To perform the pre-processing of data and apply mining techniques on it.

### **Expected Course Specific Learning Outcome**

<b>Sr. No.</b>	<b>Learning Outcome</b>
<b>1.</b>	Students will have knowledge about basic concepts and techniques of Data Mining
<b>2.</b>	Student will able to solve practical problems using data mining software
<b>3.</b>	Students will able to perform pre-processing of data.
<b>4.</b>	Students will able to apply data mining techniques.

## Syllabus

<b>Unit No</b>	<b>Title with Contents</b>	<b>No. of Lectures</b>
<b>Unit I</b>	<b>Introduction to Data Mining</b>	<b>4</b>
	1. Basic Data Mining Tasks 2. DM versus Knowledge Discovery in Databases 3. Data Mining Issues 4. Data Mining Metrics 5. Social Implications of Data Mining 6. Overview of Applications of Data Mining	1 1 1 1
<b>Unit II</b>	<b>Introduction to Data Warehousing</b>	<b>6</b>
	1. Architecture of DW 2. OLAP and Data Cubes 3. Dimensional Data Modelling-star, snowflake schemas 4. Data Pre-processing – Need, Data Cleaning, Data Integration & Transformation, Data Reduction 5. Pattern Matching	1 1 1 2 1
<b>Unit III</b>	<b>Data Mining Techniques</b>	<b>8</b>
	1. Frequent item-sets and Association rule mining: Apriori algorithm, Use of sampling for frequent item-set, FP tree algorithm 2. Graph Mining: Frequent sub-graph mining, Tree mining, Sequence Mining	4 4
<b>UNIT IV</b>	<b>Software for data mining and applications of data mining</b>	<b>4</b>
	1. R 2. Weka 3. Sample applications of data mining	2 2
<b>UNIT V</b>	<b>Text and Web mining</b>	<b>8</b>
	1. Text mining 2. Applications of Text Mining 3. Process and Tools of Text Mining 4. Web Mining 5. Web content, structure and usage mining	2 2 2 1 1

<b>4.</b>	Able to estimate Machine Learning models efficiency using suitable metrics.

## Syllabus

Unit No	Title with Contents	No. of Lectures
	<b>Software Architecture &amp; Design Pattern List of Assignments</b>	
<b>UNIT I</b>	Write a JAVA Program to implement built-in support (java.util.Observable) Weather station with members temperature, humidity, pressure and methods mesurmentsChanged(), setMesurment(), getTemperature(), getHumidity(), getPressure()	15
	Write a Java Program to implement I/O Decorator for converting uppercase letters to lower case letters.	
	Write a Java Program to implement Factory method for Pizza Store with createPizza(), orderPizza(), prepare(), Bake(), cut(), box(). Use this to create variety of pizza's like NyStyleCheesePizza, ChicagoStyleCheesePizza etc.	
	Write a Java Program to implement Singleton pattern for multithreading.	
	Write a Java Program to implement command pattern to test Remote Control.	
	Write a Java Program to implement undo command to test Ceilingfan	
	Write a Java Program to implement Adapter pattern for Enumeration iterator.	
	Write a Java Program to implement Iterator Pattern for DesigningMenu like Breakfast, Lunch or Dinner Menu.	
	Write a Java Program to implement State Pattern for Gumball Machine. Create instance variable that holds current state from there, we just need to handle all actions, behaviors and state transition that can happen. For actions we need to implement methods to insert a quarter, remove a quarter, turning the crank and display gumball.	
	Write a java program to implement Adapter pattern to design HeartModel to Beat Model.	

<b>UNIT II</b>	Write a python program to Prepare Scatter Plot (Use Iris Dataset)	
	Write a python program the Categorical values in numeric format for agiven dataset.	15
	Write a python program to implement simple Linear Regression for predicting house price	
	Write a python program to implement multiple Linear Regression for agiven dataset.	
	Write a python program to implement Polynomial Regression for givendataset.	
	Write a python program to Implement Naïve Bayes.	
	Write a python program to Implement Decision Tree whether or not toplay tennis.	
	Write a python program to implement linear SVM.	
	Write a python program to transform data with Principal ComponentAnalysis (PCA)	
	Write a python program to implement k-nearest Neighbors ML algorithm to build prediction model (Use Forge/Iris/housing Dataset)	
	Write a python program to find all null values in a given data setand remove them.

<b>Course/ Paper Title</b>	<b>Research Methodology</b>
<b>Course Code</b>	<b>23SMCS11RM</b>
<b>Semester</b>	<b>I</b>
<b>No. of Credits</b>	<b>4</b>
<b>Course Type</b>	<b>RM</b>

### **Aims & Objectives of the Course**

<b>Sr. No.</b>	<b>Objectives</b>
<b>1.</b>	Understand some basic concepts of research and its methodologies.
<b>2.</b>	Identify appropriate research topics.
<b>3.</b>	Select and define appropriate research problem and parameters.
<b>4.</b>	Prepare a project proposal.
<b>5.</b>	Organize and conduct research in a more appropriate manner.
<b>6.</b>	Write a research report and thesis.

### **Expected Course Specific Learning Outcome**

<b>Sr. No.</b>	<b>Learning Outcome</b>
<b>1.</b>	Students who complete this course will be able to understand and comprehend the basics in research methodology and applying them in research/ project work.
<b>2.</b>	This course will help them to select an appropriate research design.
<b>3.</b>	With the help of this course, students will be able to take up and implement a research project/ study.

<b>4.</b>	The course will also enable them to collect the data, edit it properly and analyse it accordingly. Thus, it will facilitate students' prosperity in higher education
<b>5.</b>	Students will be able to demonstrate the ability to choose methods appropriate to research objectives.

<b>Syllabus</b>		
<b>Unit I</b>	<b>Introduction to Research Methodology</b>	<b>10 hours</b>
	<ol style="list-style-type: none"> <li>1. Meaning of Research</li> <li>2. Objectives of Research</li> <li>3. Motivation in Research</li> <li>4. Types of Research</li> <li>5. Research Approaches</li> <li>6. Significance of Research</li> <li>7. Researcher and Characteristics of Researcher</li> <li>8. Research Ethics and Integrity</li> <li>9. Plagiarism and types of plagiarism</li> <li>10. Introduction to Plagiarism check tools</li> <li>11. Research Methods versus Methodology</li> <li>12. Research and Scientific Method</li> <li>13. Importance of Knowing How Research is Done</li> <li>14. Criteria of Good Research</li> </ol>	
<b>Unit II</b>	<b>Literature Review and Formulation of Research Problems</b>	<b>8 h ours</b>
	<ol style="list-style-type: none"> <li>1. Research Process</li> <li>2. Reviewing the literature: the purpose of a literature review</li> <li>3. Literature resources</li> <li>4. The Internet and a literature review</li> <li>5. The Internet and research strategies and methods</li> <li>6. Conducting and Evaluating literature reviews</li> <li>7. Formulation of research problem               <ol style="list-style-type: none"> <li>7.1 What is a Research Problem?</li> <li>7.2 Selecting the Problem</li> <li>7.3 Necessity of Defining the Problem</li> <li>7.4 Technique Involved in Defining a Problem</li> </ol> </li> </ol>	

<b>Unit III</b>	<b>Research Design</b>	<b>10 hours</b>
	<ol style="list-style-type: none"> <li>1. Meaning of Research Design</li> <li>2. Need for Research Design</li> <li>3. Features of a Good Design</li> <li>4. Important Concepts Relating to Research Design</li> <li>5. Different Research Designs/Methods               <ol style="list-style-type: none"> <li>5.1 Pure and Applied Research</li> <li>5.2 Exploratory or Formulation Research</li> <li>5.3 Descriptive Research</li> <li>5.4 Diagnostic Research</li> <li>5.5 Evaluation Studies</li> <li>5.6 Action Research</li> <li>5.7 Experimental Research</li> <li>5.8 Analytical Study or Statistical Method</li> <li>5.9 Historical Research</li> <li>5.10 Surveys</li> <li>5.11 Case Study</li> <li>5.12 Field Studies</li> </ol> </li> </ol>	
<b>UNIT IV</b>	<b>Hypothesis and Sampling</b>	<b>12 hours</b>
	<ol style="list-style-type: none"> <li>1. What is a Hypothesis?</li> <li>2. Nature &amp; Characteristics of Hypothesis</li> <li>3. Significance of Hypothesis</li> <li>4. Types of Hypothesis</li> <li>5. Sources of Hypothesis</li> <li>6. Characteristics of Good Hypothesis</li> <li>7. What is sampling?</li> <li>8. Aims of Sampling</li> <li>9. Characteristics of Good Sample</li> <li>10. Basis of Sampling</li> <li>11. Merits and demerits of Sampling</li> <li>12. Sampling Techniques or Methods</li> <li>13. Probability Sampling Methods</li> <li>14. Non-Probability Sampling Methods</li> <li>15. Sample Design and Choice of Sampling Technique</li> </ol>	
<b>UNIT V</b>	<b>Data Collection, Processing, and Analysis of Data</b>	<b>12 hours</b>

	<ol style="list-style-type: none"> <li>1. Collection of Primary Data</li> <li>2. Method of Data Collection - Observation, Interview, Questionnaires, and Schedules</li> <li>3. Difference between Questionnaires and Schedules</li> <li>4. Some Other Methods of Data Collection</li> <li>5. Collection of Secondary Data</li> <li>6. Selection of Appropriate Method for Data Collection</li> <li>7. Case Study Method</li> <li>8. Processing Operations and Some Problems in Processing</li> <li>9. Elements/Types of Data Analysis</li> <li>10. Statistics in Research</li> <li>11. Measures of Central Tendency, Dispersion, Asymmetry (Skewness)</li> <li>12. Measures of Relationship - Chi-Square, t-test, ANOVA <ol style="list-style-type: none"> <li>a. (f-test), Z-test</li> </ol> </li> <li>13. Simple Regression Analysis, Multiple Correlation, and Regression</li> <li>14. Partial Correlation and Association in Case of Attributes</li> <li>15. Quantitative and Qualitative Data Analysis Tools</li> </ol>	
<b>UNIT VI</b>	<b>Report Writing</b>	08
	<ol style="list-style-type: none"> <li>1. Significance of Report Writing</li> <li>2. Different Steps in Writing Report</li> <li>3. Layout of the Research Report</li> <li>4. Types of Reports (Research Proposal/Synopsis, Research Paper, and Thesis)</li> <li>5. Oral Presentation</li> <li>6. Mechanics of Writing a Research Report</li> <li>7. Precautions for Writing Research Reports</li> </ol>

<b>Course/ Paper Title</b>	NoSQL Database Technologies
<b>Course Code</b>	23SMCS11MEA
<b>Semester</b>	I
<b>No. of Credits</b>	2
<b>Course Type</b>	Elective

### **Aims & Objectives of the Course**

<b>Sr. No.</b>	<b>Objectives</b>
<b>1.</b>	Provide an overview of the concept of NoSQL technology.
<b>2.</b>	Provide an insight to the different types of NoSQL databases
<b>3.</b>	Make the student capable of making a choice of what database technologies to use, based on their application needs.

### **Expected Course Specific Learning Outcome**

<b>Sr. No.</b>	<b>Learning Outcome</b>
<b>1.</b>	Student will know almost all concepts of NoSQL
<b>2.</b>	Student will able to compare various types of NoSQL databases.
<b>3.</b>	Student will able to decide what database technology to use for particular application.

## Syllabus

Unit No	Title with Contents	No. of Lectures

<b>Course/ Paper Title</b>	<b>Practical based on Soft computing</b>
<b>Course Code</b>	23SMCS12MEB
<b>Semester</b>	I
<b>No. of Credits</b>	2
<b>Course Type</b>	<b>Elective</b>

### **Aims & Objectives of the Course**

<b>Sr. No.</b>	<b>Objective s</b>
<b>1.</b>	To implement Fuzzy operations using any Technology
<b>2.</b>	To generate an ability to design, analyze and perform experiments on real life problems using various Neural Learning Algorithms.
<b>3.</b>	To Build simple Artificial Neural Network

### **Expected Course Specific Learning Outcome**

<b>Sr. No.</b>	<b>Learning Outcome</b>
<b>1.</b>	Students will be able to implement Fuzzy operations.
<b>2.</b>	Students will be able to analyze experiments on real life problems using Neural Learning Algorithm
<b>3.</b>	Students will be able to perform experiments on real life problems using Neural Learning Algorithm.

## Syllabus

Unit No.	Title with Contents	No. of Practical Sessions
UNIT I	Write a program to implement Fuzzy Operations Union Intersection Complement Algebraic sum Algebraic product Cartesian product	15
	Write a program to implement De Morgans law.	
	Write a program to implement Max-Min Composition and Max-Product Composition.	
	Write a program to implement lambda cut	
	Write a program to implement Activation Function.	
	Write a program to implement Perceptron Learning Rule	
	Write a program to implement Hebb's Rule	
	Write a program to implement Feed Forward Network	
	Write a program for building an Artificial Neural Network by implementing the Back propagation Algorithm and test the same using appropriate data sets.	
	Write a program for solving linearly separable problem using Perceptron Model.	
	Write a program to develop supervised learning algorithm	
	Write a program to study and analyze genetic life cycle

<b>Course/ Paper Title</b>	React JS
<b>Course Code</b>	23SMCS11MEC
<b>Semester</b>	I
<b>No. of Credits</b>	2
<b>Course Type</b>	Elective

### **Aims & Objectives of the Course**

<b>Sr. No.</b>	<b>Objective s</b>
<b>1.</b>	To provide Basic knowledge to the students on React JS
<b>2.</b>	To understand React component lifecycle and different lifecycle methods
<b>3.</b>	To build interactive user interfaces and web applications
<b>4.</b>	To implement flux pattern in React applications

### **Expected Course Specific Learning Outcome**

<b>Sr. No.</b>	<b>Learning Outcome</b>
<b>1.</b>	By using libraries it will help students to build interactive UIs
<b>2.</b>	Students will be able to create React Components
<b>3.</b>	Students will able to learn react JS plugins
<b>4.</b>	Students will able to solve practical problems by using react JS

<b>Syllabus</b>		
<b>Unit I</b>	<b>Introduction to React</b>	<b>06</b>
	1. What is React? 2. Why React? 3. React version history 4. Work flow of React JS 5. Scope of React JS 6. React 16 vs React 15 7. Just React – Hello World 8. Using create-react-app 9. Anatomy of react project 10. Running the app 11. Debugging first react app	               1 1 1 1 1 1 1 1
<b>Unit II</b>	<b>React Components &amp; React JS Environment Setup</b>	<b>06</b>
	1. React component Properties 2. Types of components 3. Component Lifecycle 4. Updating Components 5. Writing your first React.js component 6. Mounting Components 7. Node setup 8. How to use NPM? 9. How to create package.json and purpose of it? 10. Best IDE for React JS and How to write optimized code in React JS?	               1 1 1 2 2 1
<b>Unit III</b>	<b>JSX</b>	<b>06</b>
	1. Introduction of Virtual DOM. 2. Expressions & Attributes 3. JSX Basics 4. Difference between JS and JSX. 5. Containers and components 6. What is Child Components? 7. What is Namespaced components? 8. What are the JavaScript expressions available in JSX?	          1 2 2 2 1
<b>Unit IV</b>	<b>REACT JS FORMS AND UI</b>	<b>06</b>
	1. Lists of Form components. 2. Setup Controlled and Uncontrolled form components. 3. Control Input elements. 4. How to set default values on all formats of Input elements. 5. React JS Form validations. 6. How to write Styles? 7. Keeping components stateless	       1 2 2 2 1

	8. Event Delegation 9. React Stateful Components Auto binding	
<b>UNIT V</b>	<b>FLUX , REDUX</b>	<b>06</b>
	1. What is Flux Architecture? 2. What are the Flux Components available? 3. Stores, Dispatchers, View Controllers, Actions, Views. 4. How Flux works? 5. Introduction to One Store. 6. Provider Component , Actions, Reducers, Sagas , Selector 7. What is redux 8. Why redux 9. Redux principles	1 1 1 2 1

<b>Course/ Paper Title</b>	<b>Paradigm of Programming Language</b>
<b>Course Code</b>	23SMCS22MM
<b>Semester</b>	II
<b>No. of Credits</b>	4
<b>Course Type</b>	<b>Major (MJ)</b>

### **Aims & Objectives of the Course**

<b>Sr. No.</b>	<b>Objectives</b>
<b>1.</b>	To Prepare student to think about programming languages analytically
<b>2.</b>	Separate syntax from semantics
<b>3.</b>	Compare programming language designs, understand their strengths and weaknesses
<b>4.</b>	Learn new languages more quickly
<b>5.</b>	Understand basic language implementation techniques
<b>6.</b>	Learn small programs in different programming Languages

### **Expected Course Specific Learning Outcome**

<b>Sr. No.</b>	<b>Learning Outcome</b>
<b>1.</b>	Students will acquire thinking of different programming language.
<b>2.</b>	Students will become aware of basic language implementation techniques.
<b>3.</b>	Students will understand the Significance of learning new programming language.

## Syllabus

Unit No	Title with Contents	No. of Lectures
<b>Unit I</b>	<b>Introduction</b>	<b>04</b>
	1. The Art of Language Design 2. The Programming Language Spectrum 3. Why Study Programming Languages? 4. Compilation and Interpretation 5. Programming Environments	02   02
<b>Unit II</b>	<b>Names ,Scopes ,and Bindings</b>	<b>08</b>
	1. The Notion of Binding Time 2. Object Lifetime and Storage Management 3. Static Allocation, Stack-Based Allocation,Heap-Based Allocation, Garbage CollectionScopeRules 4. Static Scoping, Nested Subroutines,Declaration Order, Dynamic Scoping The meaning of Names in a Scope 5. Aliases, Overloading, Polymorphism and Related Concepts, the Binding of Referencing Environments 6. Subroutine Closures, First-Class Values and Unlimited Extent, Object Closures MacroExpansion	01 01 02  02  02
<b>Unit III</b>	<b>Control Flow</b>	<b>05</b>
	1. Expression Evaluation , Precedence and Associativity, Assignments, Initialization, Ordering Within Expressions, Short-Circuit Evaluation 2. Structured and Unstructured Flow, Structured Alternatives to go-to sequencing 3. Selection - Short-Circuited Conditions, Case/Switch Statements Iteration 4. Iteration- Enumeration-Controlled Loops, Combination Loops, Iterators, Logically Controlled Loops Recursion 5. Recursion- Iteration and Recursion, Applicative-and Normal-Order Evaluation	02   02  01
<b>Unit IV</b>	<b>Data Types</b>	<b>10</b>
	1. Introduction 2. Primitive Data Types 3. Numeric Types : Integer, Floating point, Complex, Decimal,	02

	<p>Boolean Types, Character Types</p> <p>4. Character String Types</p> <p>5. Design Issues, Strings and Their Operations, String Length Operations, Evaluation, Implementation of Character String Types</p> <p>6. User defined Ordinal types Enumeration types, Designs Evaluation Sub range types, Ada's design Evaluation Implementation of user defined ordinal types</p> <p>7. Array types</p> <p>8. Design issues, Arrays and indices, Subscript bindings and array categories, Heterogeneous arrays, Array initialization, Array operations, Rectangular and Jagged arrays, Slices, Evaluation, Implementation of Array Types</p> <p>9. Associative Arrays</p> <p>10. Structure and operations, Implementing associative arrays,</p> <p>11. Record types</p> <p>12. Definitions of records, References to record fields, Operations on records, Evaluation, Implementation of Record types</p> <p>13. Union Types</p> <p>14. Design issues, Discriminated versus Free unions, Evaluation, Implementation of Union types</p> <p>15. Pointer and Reference Types</p> <p>16. Design issues, Pointer operations, Pointer problems, Dangling pointers, Lost heap dynamic variables, Pointers in C and C++, Reference types, Evaluation</p> <p>17. Implementation of pointer and reference types</p> <p>18. Representation of pointers and references Solution to dangling pointer problem Heap management</p>	<p>02</p> <p>02</p> <p>02</p> <p>02</p>
<b>Unit V</b>	<b>Subprograms and Implementing Subprograms</b>	<b>05</b>
	<p>1. Introduction</p> <p>2. Fundamentals of Subprograms</p> <p>3. Design Issues for subprograms</p> <p>4. Local Referencing Environments</p> <p>5. Parameter-Passing Methods</p> <p>6. Parameters That Are Subprograms</p> <p>7. Overloaded Subprograms</p> <p>8. Generic Subroutines, Generic Functions in C++</p> <p>9. Design Issues for Functions</p> <p>10. User-Defined Overloaded Operators</p> <p>11. Coroutines</p> <p>12. Implementing Subprograms</p> <p>13. The General Semantics of Calls and Returns</p> <p>14. Implementing "Simple" Subprograms</p> <p>15. Implementing Subprograms with Stack-Dynamic Local Variables</p>	<p>02</p> <p>03</p>

	16. Nested Subprograms 17. Blocks 18. Implementing Dynamic Scoping	
<b>Unit VI</b>	<b>Data Abstraction and Object Orientation</b>	<b>08</b>
	1. Object-Oriented Programming 2. Encapsulation and Inheritance Modules, Classes, Nesting (Inner Classes), Type Extensions, Extending without Inheritance 3. Initialization and Finalization Choosing a Constructor, References and Values, Execution Order, Garbage Collection 4. Dynamic Method Binding 5. Virtual- and Non-Virtual Methods, Abstract Classes, Member Lookup, Polymorphism, Object Closures 6. Multiple Inheritance 7. Semantic Ambiguities, Replicated Inheritance, Shared Inheritance, Mix-Inheritance	01 02  03   01 01
<b>Unit VII</b>	<b>Concurrency</b>	<b>05</b>
	1. Introduction : Multiprocessor Architecture Categories of concurrency, Motivations for studying concurrency 2. Introduction to Subprogram-level, concurrency Fundamental concepts, Language Design for concurrency, Design Issues 3. Semaphores - Introduction Cooperation synchronization, Competition Synchronization, Evaluation	02 02 01
<b>Unit VIII</b>	<b>Functional Programming in Scala</b>	<b>15</b>
	1. Introduction to Scala 2. Scala Data type 3. Scala variables 4. Scala operators and Control Structures 5. Scala Classes and objects 6. Scala Function 7. Array 8. Scala Collection (List, Set, Map) 9. Scala as Functional Programming i. Function call by name ii. Anonymous Function iii. Higher order function	05   05   05

<b>Course/ Paper Title</b>	<b>Software Project Management</b>
<b>Course Code</b>	23SMCS23MM
<b>Semester</b>	II
<b>No. of Credits</b>	2
<b>Course Type</b>	<b>Major (MJ)</b>

**Aims & Objectives of the Course**

<b>Sr. No.</b>	<b>Objectives</b>
<b>1.</b>	To covers skills that are required to ensure successful medium and large scale software projects.
<b>2.</b>	To examines Requirements Elicitation, Project Management, Verification & Validation and Management of Large Software Engineering Projects.
<b>3.</b>	To select and apply project management techniques for process modeling, planning, estimation, process metrics and risk management

**Expected Course Specific Learning Outcome**

<b>Sr. No.</b>	<b>Learning Outcome</b>
<b>1.</b>	Student will able to collect requirements of project.
<b>2.</b>	Student will able to perform verification and validation of software projects
<b>3.</b>	Student will able to select particular technique for project management.
<b>4.</b>	Student will able to apply selected technique for project.

## Syllabus

Unit No.	Title with Contents	No. of Lectures
<b>Unit I</b>	<b>Introduction to Project Management and Project Management Components</b>	<b>05</b>
	1. What is a Project?	<b>01</b>
	2. What is Project management? Project phases and project life cycle	<b>01</b>
	Organizational structure	<b>01</b>
	3. Qualities of Project Manager	
	4. WBS	
	5. Project Integration Management-Project plan development and execution	<b>02</b>
	6. Change control and CCB	
	7. Configuration management	
<b>Unit II</b>	<b>Scope Management</b>	<b>04</b>
	1. Strategic planning	<b>01</b>
	2. Scope planning	<b>01</b>
	3. Definition	<b>01</b>
	4. Verification and control	<b>01</b>
<b>Unit III</b>	<b>Time management and Cost Management</b>	<b>05</b>
	1. Activity planning	<b>01</b>
	2. Schedule development and control	<b>02</b>
	3. GANTT Chart	<b>01</b>
	4. Cost estimation and Control	<b>01</b>
	5. COCOMO model	<b>01</b>
	6. BASIC COCOMO NUMERICALS	
<b>Unit IV</b>	<b>Quality Management Human Resource Management</b>	<b>3</b>
	1. Quality planning and assurance,	<b>03</b>
	2. Organizational planning	
	3. Staff acquisition	
<b>Unit V</b>	<b>Risk Management and Procurement Management</b>	<b>03</b>
	1. Risk identification	<b>01</b>
	2. Quantification and control	<b>01</b>
	3. Solicitation management and control	<b>01</b>
	4. Contract administration	

<b>Unit VI</b>	<b>Software Metrics and Software Reliability</b>	<b>05</b>
	1. The scope of software metrics	<b>01</b>
	2. Size- oriented metrics and Function oriented metrics	<b>01</b>
	3. Software metrics data collection	<b>01</b>
	4. Analyzing software data	<b>01</b>
	5. Measurement and prediction	<b>01</b>
	6. Resource measurement	<b>02</b>
<b>Unit VII</b>	<b>Planning a measurement program</b>	<b>05</b>
	1. What is metrics plan?	<b>02</b>
	2. Developing goals, questions and metrics	<b>02</b>
	3. Where and When: Mapping measures to activities	<b>02</b>
	4. How: Measurement tools	<b>01</b>

### **Aims & Objectives of the Course**

<b>Sr. No.</b>	<b>Objectives</b>
1.	To understand the programming interface to the Unix/Linux system – the system call interface.
2.	To understand the functions of Operating Systems.
3.	To get an insight into functional modules of Operating Systems.
4.	To understand the concepts underlying in the design and implementation of Operating Systems.

### **Expected Course Specific Learning Outcome**

<b>Sr. No.</b>	<b>Learning Outcome</b>
1.	Student will able to implement various system call interfaces.
2.	Student will able to design functional modules of operating system.
3.	Student will able to use systems calls for implementing various functions in programs.

## Syllabus

Unit No	Title with Contents	No. of Lectures
<b>Unit I</b>	<b>Introduction to UNIX/Linux Kernel</b>	<b>05</b>
	1. System Structure, User Perspective	<b>01</b>
	2. Assumptions about Hardware	<b>01</b>
	3. Architecture of UNIX Operating System (TextBook-1: Chapter Topics: 1.2, 1.3, 1.5, 2.1)	<b>01</b>
	4. Concepts of Linux Programming	<b>02</b>
	i. Files and the File system	
	ii. Processes	
	iii. Users and Groups	
	iv. Permissions	
	v. Signals	
	vi. Inter process Communication (TextBook-3: Chapter 1- relevant topics)	
<b>Unit II</b>	<b>File and Directory I/O</b>	<b>8</b>
	1. Buffer headers	<b>02</b>
	2. Structure of the buffer pool	
	3. Scenarios for retrieval of a buffer	
	4. Reading and writing disk blocks	
	5. Inodes	
	6. Structure of regular file	
	i. Open	
	ii. Read	
	iii. Write	
	iv. Lseek	<b>02</b>
	v. Close	
	vi. Pipes	<b>02</b>
	vii. dup (TextBook- 1: Chapter Topics: 3.1-3.4, 4.1, 4.2, 5.1-5.3, 5.5-5.7, 5.12, 5.13)	
	viii. creat	
	ix. file sharing	<b>02</b>

	<ul style="list-style-type: none"> <li>x. atomic operations</li> <li>xi. dup2</li> <li>xii. sync</li> <li>xiii. fsync and fdatasync</li> <li>xiv. fcntl</li> <li>xv. /dev/fd</li> <li>stat, fstat, lstat</li> <li>xvii. file types</li> <li>xviii. Of Arts, Science and Commerce, Camp, Pune (Autonomous)

Affiliated to Savitribai Phule Pune University NAAC accredited 'A' Grade

<b>Course/ Paper Title</b>	Practical based on Advanced Operating System
<b>Course Code</b>	23SMCS22MEA
<b>Semester</b>	II
<b>No. of Credits</b>	2
<b>Course Type</b>	Elective

### Aims & Objectives of the Course

<b>Sr. No.</b>	<b>Objectives</b>
1.	To get familiar with the Shell commands on LINUX in AOS.
2.	To get the knowledge of file handling using LINUX commands.

### Expected Course Specific Learning Outcome

<b>Sr. No.</b>	<b>Learning Outcome</b>
1.	Student will be familiar with the Shell commands on LINUX using AOS.
2.	Student will get the knowledge of file handling using LINUX

### Practical Assignments

Assignment 1

Assignment 2

Assignment 3

Assignment 4

Assignment 5

<b>Course/ Paper Title</b>	Android
<b>Course Code</b>	23SMCS21MEB
<b>Semester</b>	II
<b>No. of Credits</b>	2
<b>Course Type</b>	Elective

### **Aims & Objectives of the Course**

<b>Sr. No.</b>	<b>Objectives</b>
1.	To understand the Android Operating System and develop application using Android open source platform.
2.	To understand the Android Operating System and develop application using Android open source platform.
3.	To develop android Apps.

### **Expected Course Specific Learning Outcome**

<b>Sr. No.</b>	<b>Learning Outcome</b>
1.	To Create simple GUI applications, use built-in widgets and components on the Android Platform
2.	To Design and implement mobile applications involving data storage in SQLite database
3.	To Demonstrate their skills of using Android software development tools
4.	To understand the concepts of SQLite Database

<b>Syllabus</b>		
<b>Unit I</b>	<b>Introduction To Android Programming</b>	<b>06</b>
	1. Overview 2. History and Versions 3. Features of Android 4. Architecture of Android 4. Components of an Android Application, Manifest file 5. Android Environment Setup- Tools – (JDK, SDK,Eclipse/Android Studio, ADT, AVD, Android Emulator) 6. First Hello World Program	1 1 1 2 1
<b>Unit II</b>	<b>Activity, Intent and Layout</b>	<b>07</b>
	1. Introduction to Activities 2. Activity Life cycle 3. Service Life cycle 4. Fragments, Life cycle of fragments 5. Adding Fragments dynamically 6. Introduction to Intents 7. Types of Intent 8. Linking Activities using Intents	1 1 2 2 1
<b>Unit III</b>	<b>Android User Interface</b>	<b>06</b>
	1. Layout Manager 2. View and ViewGroup 3. Linear Layout 4. RelativeLayout 5. AbsoluteLayout 6. TableLayout 7. GridLayout 8. Constraint Layout 9. FrameLayout 10. Scroll Layout	1 2 1 1 1
<b>Unit IV</b>	<b>Designing User Interface with Views</b>	<b>06</b>
	1. Basic Views 2. Button(Push Button, Check Box, Radio Button, Toggle Button, Image Button) All components (e.g Button , Slider, Image view,Toast) 3. Text Fields 4. Spinner 5. ListView 6. Toast	2 1

	7. ScrollView 8. Progress BarView 9. Auto Complete TextView 10. Alert Dialog 11. DatePickerDialog. 12. TimePickerDialog 13. CustomDialog 14. Using Menus with Views – Options Menu, Context Menu andPop up menu	2    1    
<b>UNIT V</b>	<b>Databases – SQLite</b>	<b>05</b>
	1. Introduction to SQLite 2. SQLiteOpenHelper and SQLiteDatabase 3. Creating , opening and closing database 4. Working with cursors, Insert, Update, Delete 5. Building and executing queries	1 2  2

**Aims & Objectives of the Course**

<b>Sr. No.</b>	<b>Objectives</b>
1.	To allow students to demonstrate the personal abilities and skills required to produce and present an extended piece of work
2.	To allow students to engage in personal inquiry, action and reflection on specific topics and issues.
3.	To allow students to focus on, and demonstrate an understanding of, the areas of interaction.

**Expected Course Specific Learning Outcome**

<b>Sr. No.</b>	<b>Learning Outcome</b>
1.	Students will have abilities and skills skills required to produce and present an extended piece of work in corporate sectors.
2.	Students will know how to interact with team members while working on project.
3.	Students will able to share their knowledge and views.

Unit No	Title with Contents	No. of Sessions
Unit I	<p><b>Guidelines:</b></p> <ul style="list-style-type: none"> <li>• Students should work in a team of minimum 2 and maximum 3 students.</li> <li>• Students can choose a project topic without any restriction on technology or domain.</li> <li>• The student group will work independently throughout the project work including: problem identification, information searching, literature study, design and analysis, implementation, testing, and the final reporting.</li> <li>• Project guide must conduct project presentations (minimum 2) to monitor the progress of the project groups.</li> <li>• At the end of the project, the group should prepare a report which should conform to international academic standards. The report should follow the style in academic journals and books, with clear elements such as: abstract, background, aim, design and implementation, testing, conclusion and full references, Tables and figures should be numbered and referenced to in the report. The final project presentation with demonstration (UE) will be evaluated by the project guide (appointed by the college) and one external examiner (appointed by the University).</li> </ul>	15

<b>Course Type</b>	Elective

### **Aims & Objectives of the Course**

<b>Sr. No.</b>	<b>Objectives</b>
1.	The project assignments are a compulsory part of the project course and should be carried out by each project group.
2.	Project assignments are to be given by the guide for continuous internal evaluation.
3.	The project assignments are to be allotted to each group separately by the project guide on the basis of the implementation technology.

### **Expected Course Specific Learning Outcome**

<b>Sr. No.</b>	<b>Learning Outcome</b>
1.	Student will able to understand the flow of system development
2.	Student will able to form the content of documentation
3.	Student will able to understand documentation of testing of a project

## Syllabus

Unit No	Title with Contents	No. of Practica l Sessions
Unit-I	Project Time management: plan (schedule table), Gantt chart, Roles and responsibilities, data collection, Implementation	15
	Simple assignments to evaluate choice of technology	
	Assignments on UI elements in chosen technology	
	Assignments on User interfaces in the project	
	Assignments on event handling in chosen technology	
	Assignments on Data handling in chosen technology	
	Online and offline connectivity	
	Report generation	
	Deployment considerations	
	Test cases

<b>Course/ Paper Title</b>	Internship
<b>Course Code</b>	23SMCS21OJ
<b>Semester</b>	II
<b>No. of Credits</b>	4
<b>Course Type</b>	OJT/FP

### **Aims & Objectives of the Course**

<b>Sr. No.</b>	<b>Objectives</b>
1.	To provide to students the feel of the actual working environment.
2.	To gain practical knowledge and skills, which in turn will motivate, develop and build their confidence
3.	To provide the students the basis to identify their key operational area of interest.

### **Expected Course Specific Learning Outcome**

<b>Sr. No.</b>	<b>Learning Outcome</b>
1.	Students will be able to communicate efficiently.
2.	Student can acquire Industrial experiences and at the same time familiarize themselves with the real working environment at the Industrial training site.
3.	Student will take a hold on professional ethical values as basis to venture into professional career in the future.

## Syllabus

Unit No	Title with Contents	No. of Sessions
Unit I	<p><b>Guidelines:</b></p> <ul style="list-style-type: none"> <li>• Each student must individually complete minimum 1.5 months full time Industrial training / Institutional project</li> <li>• College should assign a student mentor to every student. The mentor will monitor the progress of the student throughout the semester for continuous assessment.</li> <li>• Student should submit a valid offer letter and synopsis within two weeks of starting the internship.</li> <li>• There will be continuous assessment of the work done by the student during the internship period.</li> <li>• Continuous assessment guidelines:               <ol style="list-style-type: none"> <li>1. Student should submit a weekly report in the college to the mentor.</li> <li>2. The report should contain the following details: Name of student, project title, company name, company mentor, daily activities and results/output, proposed work for next week.</li> <li>3. The weekly report should be duly signed by the student and company mentor/ institute guide (CM).</li> <li>4. Student Mentor should maintain weekly attendance record for every student.</li> <li>5. Two presentations should be conducted for each student</li> <li>6. Student Mentor should take feedback from the Company mentor regarding overall performance of the student.</li> </ol> </li> <li>• At the end of the internship period, each student should prepare a report which should conform to international academic standards.</li> <li>• The report should follow the style in academic journals and books, with contents such as: abstract, background, aim, design and implementation, testing, conclusion and full references, Tables and figures should be numbered and referenced to in the report.</li> </ul>	12
